

BROWNELLS FRONT SIGHT INSERT KIT

Make Inserts Quickly & Easily In A Variety Of Colors

It's been several years since there was a good, do-it-yourself product on the market for making sight inserts, so we decided the best way to fill the gap was to go out and develop our own. The result is our latest "assist" for the professional gunsmith and serious hobbyist - a kit with everything you need to add, change, or rebuild colored front sight inserts on revolvers quickly and easily. Although primarily designed for wheelguns, it'll also let you make custom inserts for a variety of rifles, shotguns, and pistols. Sight inserts offer many benefits for target shooters and hunters, especially in situations requiring fast, accurate front sight acquisition, like dawn and dusk, when game is more likely to be active. Never again replace a perfectly good front sight because it's too hard to see in low light, your eyes aren't as good as they used to be, or because the insert has faded, broken, or fallen out. Our kit contains everything you need to make professional looking inserts formed to the exact contours of your gun's front sight. Mix the liquid acrylic and powdered activator with the concentrated dye to create bright, high-contrast inserts that are stronger and more durable than factory originals at a fraction of the cost of replacement or custom sights. Kit includes dyes in five popular colors—red, green, orange, yellow, and white. Step-by-step instruction booklet show you how to mix the ingredients (the ratios aren't that critical so it's tough to screw up) and create forms to install inserts that won't shoot loose, even on the hardest recoiling guns. We also explain, in detail, how to hand cut a dovetail for an insert on a gun that doesn't already have one. With a hardening time of around 20 minutes, it's so fast and easy you'll want to add inserts to get the best accuracy and maximum versatility from all your iron-sighted guns. Refill supplies sold separately, so you can replace only the ingredients you use up rather than buy a whole new kit.

SPECS: Kit contains: 1 oz. (29.57 ml) Liquid Acrylic; 2 oz. (59.15 ml) Powdered Activator; .05 oz. (1.5 g) each of red, green, orange, yellow, and .19 oz. (5.3g) of white pigment; 5 mixing cups; complete instructions.

KG INDUSTRIES SITE KOTE

Change Sight Colors Instantly; Great For Touch-Up Or Changing Colors To Match Conditions

High-pigment sight paints allow the iron sight shooter to add, change or touch-up sight colors in as little as 60 minutes. Greatly improves sight acquisition, shooter focus, and helps shooters tailor their sights for competition, hunting or self defense. Coating dries flexible to resist chipping and will not fade over time. Great for adding color to new gun sights and archery sight pins, or touching up worn, or chipped sights on all types of weapons. Easy-to-use needle applicator bottle puts the exact amount of paint right where you want it - no waste and no paint brush required. Shake bottle, apply and allow 1 hour to dry. One bottle paints a lifetime of sights.

SPECS: 1/4 oz. (7.4 ml) needle applicator bottle. Available in Red, White, Neon Green, Neon Yellow and Safety Orange.

AMERIGLO PROGLO SIGHTS for GLOCK®

Low-Profile Combat Sights With Easy-To-See Tritium Dots For Fast Targeting In Low Light

ProGlo pistol night sights have a pair of self-illuminating Tritium dots flanking the rear sight's U-notch and a fluorescent orange surround on the front sight's Tritium dot. Helps you identify the front sight and line up the 3 dots FAST! Helps you acquire the sights and get on target quickly under stress. Works like a simple, 3-white-dot system for enhanced visibility in daylight. Nothing to turn on: as the ambient light gets lower, the Tritium dots start glowing. These sights are drop-in replacements for factory sights and feature streamlined contours with rounded corners to help prevent snags and hanging-ups. Precision-machined steel sight bodies sit low in the slide to resist catching on clothing during the draw, yet stand up to the abuse of hard operational and competition use. Available with either a Orange outline front sight or luminescent green outline front sight. The LumiGreen paint on the luminescent green outline will glow for approximately 10 minutes after light exposure.

- #100-039-249 Pro Glo Set for Glock, Orange Front Outline, 4K94P99. \$ 99.99
- #100-039-251 Pro Glo Set for Glock, LumiGreen Front Outline, 4K94K99. 99.99

AMERIGLO AGENT SIGHTS for GLOCK®

Duty/Carry Sights for Operation in Any Light Conditions

AmeriGlo's Agent sight is a major step forward in night sight design that delivers improved visibility and faster sight acquisition in any lighting conditions. These are low-profile, fixed sights designed to meet the daily carry needs of law enforcement officers. In fact, Agent sights were recently selected by a large federal law enforcement agency as its carry sight of choice. These sights employ the proven 3-dot configuration preferred by many experienced shooters. The ProGlo style front blade has a vivid green Tritium lamp surrounded by a bright luminescent ProGlo Orange or Yellow surround, so there's no trouble identifying your front sight under stress. (Luminescent paint will glow brightly for 10 minutes after exposure to a light source.) The fixed rear sight has a rounded U-notch flanked by two green Tritium lamps with subdued black outlines. The Swiss-made self-illuminating Tritium lamps are backed by the AmeriGlo's 12-year warranty. Sight bodies are machined from high-grade steel bar-stock, dehorned to prevent snagging on your clothing during the draw, and given a durable, non-reflective black finish to match your Glock's slide. The rear sight body is shaped to support one-handed slide racking in an emergency. And they are easy-to-install, drop-in replacements for factory sights.

SPECS: Rear U-notch (all): .165" wide. Front sights: .140" wide (G42,43 is .125" wide). 9mm/.40 S&W/.357 SIG front: .180" high. 10mm/.45 ACP front: .165" high. 42/43 front: .190" high. Gen5 set fits all models of Gen5 pistols ONLY (front: .200" high).

AMERIGLO CAP SIGHT SET for GLOCK®

Eye-Catching, Luminescent Sights With Tritium Front

Combat Application Pistol (CAP) sights have two bright, unmistakable sight reference points that enable rapid target acquisition under all light conditions. Bright, lime green photoluminescent paint surrounds a self-illuminating Tritium dot in the front, with a matching horizontal Tritium bar in the rear. Painted areas glow for several minutes after exposure to ambient light to give the shooter's eyes time to adapt in low light. Steel sight body has black nitride finish that matches your pistol and gives maximum durability and corrosion resistance.

- SPECS:** Steel, matte black nitride finish, lime green photoluminescent accents. GL-614 fits Glock 17/19/22/23/24/26/27/33/34/35/37/38/39. GL-615 fits 20/21/29/30/31/32/36.

NEW! Item **AMERIGLO SEMI-AUTO PISTOL SIGHTS**

Low-Profile Combat Sights In Plain Black Or With Tritium Dots

Fixed, low-profile combat sights are drop-in replacements for factory sights and feature streamlined contours with rounded corners to help prevent snags and hanging-ups. Precision-machined steel sight bodies sit low in the slide to resist catching on clothing during the draw, yet stand up to the abuse of hard operational and competition use. 

SIGHTS FOR GLOCK® - Night sights have two self-illuminating, Trijicon® Tritium inserts in the rear sight and one in the front blade to provide an easy-to-see, 3-dot sight picture in low-light conditions. Helps you acquire the sights and get on target quickly under stress. Works like a simple, 3-white-dot system for enhanced visibility in daylight. Nothing to turn on: as the ambient light gets lower, the Trijicon® Tritium dots start glowing. **Classic** Tritium sights have standard-width rear notches, and green front and rear dots. **Pro Series** night sights have an extra-wide rear notch that allows more light around the front blade to speed target acquisition. Rear sight face extends all the way to the back of the slide for maximum sight radius. Wedge-shaped rear sight body has fully rounded edges and sits low in the slide to resist snagging on clothing during the draw. Green front sight insert; available with Green or Yellow rear dots. **Ghost Ring** rear aperture sight uses the eye's natural ability to center objects in a circle to aid in fast target acquisition. Tritium dots on each side of the ghost ring are smaller than the front sight dot to eliminate confusion during sight alignment. Green front sight insert; available with Green or Yellow rear dots. **Plain Black Front** sights have traditional, fine-line serrations on the rear face to help prevent glare. Can be used in conjunction with Night Sights for distinctive dot/no-dot combination sight pictures.

SPECS: Machined steel, matte black finish. **Plain Black Front** - .450" (11mm) long, .090" (2.9mm) wide, heights indicated in table. **Night Sights** available with green front/green rear (G/G) or green front/yellow rear (G/Y) dots. **Classic Night Sights** - Front: .450" long, .140" (3.6mm) wide, .165" (4.2mm) high. Rear: .315" long, .830" wide, .150" (3.8mm) wide notch. **Pro Series** - Front: .450" long, .125" (3.2mm) wide, .160" (4.1mm) high. .11" (2.8mm) diameter green Tritium dot. Rear: .650" (16.5mm) long, .720" (18.3mm) wide with .180" (4.6mm) wide notch, and two .070" (1.8mm) diameter Tritium dots. **Ghost Ring** - Front: .450" long, .125" wide, .240" (6.1mm) high. .11" diameter green Tritium dot. Rear: .700" (17.8mm) long, .740" (18.8mm) wide, with .270" (6.8mm) diameter aperture and two .050" (1.3mm) diameter Tritium dots.

AMERIGLO PRO I-DOT SIGHTS

Vertical Two-Dot System Enables Quick Sight Alignment

An alternative to traditional sights, Pro I-DOT sights encourage accurate, instinctive sight alignment without taking the time to line up a three-dot sight picture. Simply position the top dot directly above the bottom dot on the target and squeeze the trigger! Tritium inserts and photo luminescent front-sight outlines make these sights visible in all light conditions - day or night. **Glock set** features a green rear dot and a green front sight with a lime-green outline. **Smith & Wesson (S&W)** set has a green rear dot and a green front sight with an orange outline. **SPECS:** Machined steel, matte black finish. Fits factory dovetails. **Glock** - .199" front blade height. Fits models 17, 19, 22, 23, 24, 26, 27, 33, 34, 35, 37, 38 and 39. **S&W** - .159" front blade height. Fits S&W M&P.

BROWNELLS S&W REAR SIGHT REBUILD KITS

Every Little Part Required For S&W Factory Rear Sights

Here's every replaceable part contained in the rear sight assembly, conveniently packaged in time-and-money saving kits. 

PARTS KIT #1 - Windage screws must be broken anytime a standard sight blade is replaced; here are the replacements. 

SPECS: Single Pak contains 1 windage adjustment screw w/nut, 2 detent plungers and 2 springs. Six Pak contains 6 windage adjustment screws w/nuts, 6 detent plungers and 6 springs.

#078-001-001 S&W Parts Kit #1, each, 8G10I39 \$ 12.99

#078-001-006 6 S&W Parts Kits #1, 8G55J99 69.99

PARTS KIT #2 - The elevation stud and spring clip are the most commonly lost parts on a S&W rear sight. 

SPECS: Package contains one of each. Paks of one or six.

#078-002-001 1 S&W Parts Kit #2, 8G5B24 \$ 6.99

#078-002-006 6 S&W Parts Kit #2, 8G23J99 29.99

S&W SIGHT NUT SPANNER - MAGNA-TIP® Bit, made to fit the windage nut that secures the S&W rear sight leaf. To use: Drill out staking, hold nut with Spanner and unscrew the screw. To install: Hold new nut with Spanner and seat screw. Always turn the screw; never the nut. Because it is fragile, and can break if you turn it, the Spanner is not guaranteed against breakage. **SPECS:** 1 1/2" (3.8cm) long, .154" (3.9mm) diameter.

#080-431-000 2 Sight Nut Spanners, 8K9M19 \$ 12.99

BROWNELLS/WEIGAND COMBAT S&W REVOLVER

COMPETITION REAR SIGHT BLADE KIT

Provides A Sharp, Easy-To-Align Sight Picture

Flat blade gives a crisp, target-style sight picture that eliminates the distracting "double-notch" found on factory sights. .160" high blade (same as factory) features an angled and serrated rear face that reduces glare. Extends over the rear of the sight body for a cleaner look and gives a slight increase in sight radius. Available in two notch widths, .110" for target and PPC use, plus .125" for IPSC, IDPA and pin shooting. Deeper notch gives easier eye alignment. **SPECS:** 6061-T6 aluminum, matte black, anodized. Heat treated. .700" (17.8mm) blade width, .371" (9.4mm) height, .350" (8.9mm) long, .085" (2.2mm) deep notch. Kit includes windage screw assembly for installation. Fits Smith & Wesson K, L, and N frame revolvers. Will work on all with adjustable sights.

#078-000-012 .110" Notch Sight Blade Kit, 8G25H49 .. \$ 29.99

#078-000-013 .125" Notch Sight Blade Kit, 8G25G49 .. 29.99

COLT FRONT SIGHTS for NEW COBRA REVOLVER

Eye-Catching Front Sights Are Easy To See in Low Light

These original factory replacement front sights bring modern low-light sighting technology to Colt's new Cobra revolver. They are correct replacement for damaged front fiber optic or Tritium sights OR excellent upgrades if your Cobra came out of the box with a plain "iron" front sight. The **Fiber Optic** sight's open top lets its red fiber optic rod gather and concentrate ambient light, so the sight appears to glow and naturally attracts your eye. The self-illuminating Tritium in the **Tritium Night Sight's** insert produces a soft glow to help you achieve a quick sight picture in really low light, while the eye-catching white ring around the insert attracts the eye in daylight. With either sight, the result is you pick up the sight faster and get it on the target faster for improved shooting performance almost any lighting conditions. Rugged steel sight housing with rich blued finish. Fits NEW Cobra revolver front sight dovetail, only. Much to the joy of Colt fans all over the world, the Cobra represents the company's long-awaited return to series revolver production. But preferring a classic wheelgun as your go-to sidearm doesn't mean you have to settle for a traditional plain black front sight. Get your Colt Cobra a genuine factory replacement front Fiber Optic or Tritium sight, and update your revolver to 21st century capabilities. 

- #160-000-449 Fiber Optic Front Sight for NEW Cobra, 6A18P89 \$ 20.99
- #160-000-450 Tritium Front Sight for NEW Cobra, 6A64B59 75.99

CYLINDER & SLIDE "STRONG" FRONT SIGHT

Extra Metal Prevents Front Sight Failure; Fits Novak Dovetail

Heavy duty front sight is over-engineered with the needs of the tactical operator in mind. Plain, black blade incorporates an integral "gusset" of reinforcing metal between the base and the blade for additional strength that helps prevent breakage. Ideal choice for pistols used during room clearing operations or close quarter battle. Fits in the standard Novak-style front dovetail cut. Pre-drilled for vertical roll pin.  **SPECS:** Machined steel, matte black finish. Blade - .295" (7.3mm) high, .125" (3.1mm) wide. Fits standard .330" x .65" Novak front dovetail cut. Includes stainless steel roll pin.

- #206-000-044 "Strong" Front Sight, 6K24C64 \$ 28.99

HEINIE SPECIALTY SUPPRESSOR-HEIGHT "STRAIGHT EIGHT" LEDGE NIGHT SIGHT SET for GLOCK®

Fast, Low-Light Sight Pickup With Glowing Trijicon® Dots

Fixed sights with high-quality Trijicon® self-illuminating tritium lamps provide a fast, easy-to-see sight picture in all light conditions. The exclusive two-dot "Straight Eight" design places one front dot on top of a single rear dot to make sighting simple and fast. Both sights are extra tall so the sight picture can be visible over sound suppressors. There's also a vertical, square-cut front face on the rear sight that provides extra purchase for emergency, one-handed slide racking. The glare-free rear blade has smooth, rounded corners that can't catch on loose clothing or holsters. Sold as a matching front and rear sight set. **SPECS:** Steel, blued, matte finish. Rear Blade - .700" (17mm) x .250" (6.5mm). Notch - .119" (3mm) x .125". Body - .712" (18mm) x .727" (18.4mm), 6 oz. wt. Fits in all Glock factory dovetails.

- #394-000-064 Suppressor-Height Glock Strt 8 Ledge Sight, 4C129C19 \$ 151.99

EGW HANDGUN

FIBER OPTIC FRONT SIGHT

Enhanced Sight Picture In Bright Or Low Light

Interchangeable, red or green, fiber optic insert glows brightly, drawing your eye to the sight for fast pickup and improved shooting performance. Open center gathers lots of light for a bright dot. Three heights match most rear sights. **Kimber** and **Para-Ord** replace factory height blades. Fits factory dovetails. **SPECS:** Steel, black, matte finish. Blade - .125" (3.2mm) wide. Models for 65° x .330" x .070", 60° x .330" x .070" dovetails, plus Kimber Classic, and Para-Ord Limited.

HEINIE SPECIALTY SEMI-AUTO SLANTPRO® LEDGETM SIGHTS

Low Profile, Fixed Sights Give A No-Snag Draw

Wedge-shaped body with rounded edges provides a smooth, snag-free draw for concealed carry and competition guns. Sits low in the slide for minimum profile. SlantPro rear sight has a rear face that slants slightly forward. A vertical, square-cut "ledge" on the front face of the rear sight provides extra purchase for one-handed slide racking. Fine-line serrations on the rear faces of the front and rear sight blades eliminate glare for best possible sight picture. Fits factory dovetail cuts; minor fitting may be required. Supplied as a front/rear set. 

SPECS: Steel, matte black finish. Rear Sight: .125" wide notch, unless otherwise indicated. Other dimensions vary depending on model. Front sight heights vary to regulate properly with rear sight. **Glock** fits all models except G36. Ledge rear sight has .156" wide notch. **S&W M&P** - Rear sight has .140" wide notch.

HIVIZ LITEWAVE H3™ SIGHT SETS

All green w/WS front

Orange & Green w/WS on front

Green w/orange surround on front

A "Triple-Threat" Technological Advancement on Traditional Night Sights!

LiteWave H3™ sights deliver a one-two punch of Tritium and LitePipe fiber optic technology to ensure you can see your pistol's sights 24 hours a day in ANY light conditions. The LitePipe fiber optic rods gather ambient light to produce bright colored aiming dots that are as easy to acquire in the sunlight of high noon as in the gathering shadows before sunset. The dots are in the classic, highly intuitive, horizontal 3-dot pattern. At night, the self-illuminating Tritium inserts - filled with extra-bright "H3" Tritium gas - take over to maintain full visibility of those three dots. Day or night, a bright white or orange outline around the front dot helps the shooter distinguish it from the rear dots. Sold as front/rear sight sets and are engineered for a drop-in fit to your pistol's factory slide dovetails (screw holes, in the case of Glocks). Sight bodies are made entirely of steel to ensure thorough protection of the Tritium and fiber optic inserts; a durable satin black finish blends well with the factory slide finish. Sights are sized for proper clearance in standard holsters for your pistol. Isn't it about time to ride the Wave? Put a set of LiteWave H3s on your pistol, and enjoy the peace of mind you get from knowing whatever the situation you won't lose time trying to find your sights! Available color combos: All sets come with Green LitePipe with choice of White (WS) or Orange (OS) surround. Choice of Green or Orange rear LitePipes. **Kimber 1911** sets fit Kimber pistols with fixed sights; does not fit Micro. **Glock** sets available for standard, large, and G42/43 frame pistols & fit all "Gens". **Smith & Wesson M&P** fits full-size & compact pistols in all calibers; does not fit CORE, M&P 22 or M&P long slide. **Springfield XD** fits XD, XDS, XDE & XD-M; does not fit XD with 5.25" barrel.

KENSIGHT COMBAT CARRY ADJUSTABLE REAR SIGHT

Rounded Blade Edges Won't Snag On Clothing Or Holsters

Enjoy the accuracy of a fully adjustable, competition-style rear sight in a package suitable for daily carry. Beveled edges on sight body and radiused corners on blade minimize chances of snagging on clothing or holster. Blade, sight body, and base are EDM-wire machined from high-grade, 4140 billet steel, then heat-treated to Rc 28-32 to retain the extra-tight tolerances. Front hinge pin is hardened to Rc 60 for reliable, long-lasting service without breakage. Fine serrations on the rear sight blade surface reduce light reflection to enhance sight pick up in all light conditions. Consistent, click adjustable detents for windage and elevation provide precise, repeatable settings. **SPECS:** 4140 steel, blued, matte finish. **BM #1** - Fits pistols with the Bo-Mar BMCS rear sight dovetail. **LPA Cut 1911** - Fits Springfield Armory, Para-Ordnance, Nowlin, High Standard, Olympic Arms, and Charles Daly 1911 Auto pistols with the LPA slide cut for adjustable sights.

- #100-002-637 BM #1 Rear Sight, 5A62J89 \$ 73.99
- #100-002-638 LPA Cut 1911 Rear Sight, 5A62K04 72.99

KENSIGHT ADJUSTABLE NIGHT SIGHT

Glowing Tritium Lamps Maximize Sight Visibility In Low Light

Genuine, Trijicon, green Tritium lamps feature polished quartz lenses for improved sight recognition in low light, plus appear as white dots for enhanced sight acquisition in bright sunlight as well. Sight bodies are EDM machined from 4140 steel, then heat-treated to Rc 38-40 and vacuum tempered to retain the extra tight tolerances. Features precise click-adjustments for consistent changes in windage and elevation. Fine line serrations on rear blade surface cuts light reflection to enhance sight pick up. **SPECS:** 4140 steel, blue, matte finish. .076" (1.9mm) diameter Tritium lamps. **BM #1** retrofits pistols modified to accept the Bo-Mar BMCS rear sight. **LPA** fits Springfield Armory, Para-Ordnance, and Charles Daly 1911 Autos using the LPA TRT dovetail.

RUGER®LCR™ - Drop-in replacement for factory front sight has contoured base to match the barrel radius for a snug fit and streamlined appearance. Secures to factory sight mounting stub with included steel cross-pin.
SPECS: Steel, black, matte finish. Green light rod. .850" (21.6mm) long.
#638-000-193 LCR Front Sight, Green, 8C32Q29 **\$ 37.99**

REAR SIGHT DOVETAIL INTERCHANGEABILITY

The term Bo-Mar Cut® is a registered trademark of Bo-Mar Tool And Manufacturing Co., Inc. We carry rear sights from various other manufacturers that fit in cuts identical to the Bo-Mar cut. To avoid trademark infringement, you will see the following sight cuts, along with the symbol that will represent that specific sight, listed in the SPECS section of rear sights from manufacturers other than Bo-Mar.

KENSIGHT CLASSIC TARGET SIGHTS

Windage & Elevation Adjustable in Crisp Clicks; Precision Wire-EDM Machined for Precise Fit

Provides consistent accuracy through better production methods. Electro-discharge machined from 4140 steel, heat-treated to Rc 38-40, then vacuum tempered to help retain these tolerances for many years to come. One-piece blade is cut from solid steel barstock, so it won't fly apart when your shot matters most. Consistent, click-adjustable detents for windage and elevation give precise repeatability. All models feature a full-serrated blade for better target recognition and a rebated square notch for improved, "shadowless" front sight definition. **BM #1 White Dot** model has rounded corners like the old Bo-Mar combat style adjustable sight, and features a .359" x .60" dovetail for mounting and machining of slide for "low mount." **Elliason** fits Colt Anaconda, Diamondback, Gold Cup, Officer's Model Match, Python, Trooper, Ace, and others originally fitted with either Accro or Elliason sights.
SPECS: 4140 steel, blue, matte finish. Blade - .750" (19mm) wide, .433" (1mm) thick. Notch - .100" (2.5mm) deep (except BM #1 Deep Notch), .134" (3.3mm) wide.

NEW! MARBLE ARMS COLT NEW PYTHON/ COBRA/KING COBRA FIBER OPTIC FRONT SIGHT

Makes Getting Your "Rampant Horse" Wheelgun on Target FAST & EASY

Just because you're going tried-and-true Old School with a Colt revolver, doesn't mean you have to settle for an old-fashioned, difficult-to-acquire sight picture. Marble's fiber optic front sights make it easy get on target - and stay on - with their brilliant, eye-catching, high-visibility of fiber optic dot. This front sight is the perfect replacement for a damaged factory front sight - or if you just want the upgrade. It's designed to fit the factory front sight dovetail on Colt's New Python, Cobra, and King Cobra revolvers. When installed the blade sits .140" high and .125" wide. That glowing .060" diameter fiber optic dot really draws the eye and helps you get the front sight and hence the rear sight lined up on the target fast. The sight body itself is blued steel. Available with a **Green** or **Orange** dot. 
#579-000-182 Colt Python FO Front Sight, Green, 6B34G50 **\$ 22.99**
#579-000-181 Colt Python FO Front Sight, Orange, 6B34G50 **22.99**

L.P.A. SIGHTS ADJUSTABLE REAR SIGHT

Enhances Accuracy For Target & Practical Shooting

Click-adjustable rear sight works with your pistol's existing front sight to give you a precise sight picture for competition and target shooting. Two white dots (**WD**) on either side of the notch help you get the front sight blade neatly centered quickly. Some models also available with a solid white outline (**WO**) around the notch or plain black (**PB**) with no white markings. Machined from solid steel with a tapered dovetail that locks securely into the pistol's existing rear sight slot for a drop-in installation - no machining or milling required. Hardened windage and elevation click adjustment screws mean that your setting stays locked in. **Browning Hi Power** also available in a fiber optic (**F/O**) set with two green dots on rear sight, red dot on front sight.
SPECS: Machined steel, matte black oxide finish. Includes Allen wrench and adjustment screwdriver.

HIVIZ WALTHER P22/P22Q FIBER OPTIC FRONT SIGHT

Improves Sight Visibility For Fast Target Acquisition

Direct replacement for factory sight uses light-gathering LitePipe fiber optic rods that help you acquire the sight and get on target fast. The bright, eye-catching dot really stands out and gives you a sight picture that's fast-to-pick-up in poorly lit surroundings, bright daylight, or anything in between. Machined steel sight body protects the LitePipes from impact and blend neatly into the slide. Comes with a set of interchangeable red and green LitePipes that let you change the dot color and size to suit your specific shooting conditions. 
#638-000-195 Walther P22/P22Q Front Sight, 8C00BEH **\$ 26.99**

L.P.A. SIGHTS ADJUSTABLE SIGHT SETS

Streamlined & Compact Plus Full Adjustability

Low profile, sights feature micrometric windage/elevation adjustments with hardened click screws and a tapered dovetail for a strong lock into the existing groove. Drop-in front and rear replacements fit factory dovetails; minor gunsmithing or fitting maybe required, especially for front sight. Offers the classic, instinctive three-dot sight picture, with a choice of white dots (**WD**) or fiber optic dots (**FO**) with green rear dots and a red front (**grn/red**). Unless otherwise noted below, FO sights come with 1 red and 1 green set of interchangeable inserts so you can choose the color or color combination that's best for your eyes. **PB/R** - plain black rear sight and a red front sight. **LumNS** - L.P.A.'s Luminova self-illuminating night sights; they appear yellowish white in daylight, then glow a gentle green in low light. **Novak 1911** sets have standard Novak .495" x .65" rear dovetail and .330" x .65" front dovetail. **Carry** sights provide full windage/elevation adjustability and are designed specifically for concealed-carry pistols, with neatly beveled edges that won't snag on clothing or holster.
SPECS: Machined steel, matte black oxide finish.

MEPROLIGHT TRU-DOT® NIGHT SIGHTS

FOR POPULAR HANDGUNS Always "On";
No Batteries, No Charging

Really "shines" when other sights are useless. No switch to turn on, no batteries to wear out. Both front and rear blades have their own green Tritium gas light source and provide a green/green (grn/grn), 3-dot sight picture. Some models also available in green/yellow (grn/yel) and green/orange (grn/orn). The front sight is always green for contrast with the rear sight. Unaffected by weather, gun solvents or oils. Used by NATO, U.S., and Israeli armies. Also ideal for law enforcement and others requiring accuracy in low-light conditions. Contains both front and rear sights. Rear sights either replace the original rear entirely or, as on S&W revolvers, a new rear leaf, screw and nut are provided. Front sights either replace the original (1911 Auto); slip over and are pinned to the original blade (most other autos); or replace the factory colored insert (S&W Autos). Factory warranty on TRU-DOT sights to the original purchaser for 12 years.

SPECS: Blued steel with Tritium inserts. Sights marked Adj. fit guns originally equipped with factory, adjustable sights. Sights marked Fxd. fit guns originally equipped with factory, fixed/non-adjustable sights. S&W models will NOT fit guns originally equipped with plastic sights.

NIGHT FISION

PERFECT DOT NIGHT SIGHTS

Robust, Easy-To-Acquire & 30% Brighter Than Standard Night Sights

Night Fision's Perfect Dot night sights have a revolutionary new design with brighter, more vivid, aiming dots than traditional night sights. Like all night sights, Perfect Dots use self-illuminating Tritium to get the "always on" glow that makes them so effective. The difference is PDs have 30% more Tritium, so they are extra bright. The Tritium insert isn't surrounded by a painted-on ring, but rather one made of a daylight fluorescing material that produces optimum visibility in daylight. The result is what the Night Fision folks have dubbed the "Perfect Dot." It provides maximum visibility in both nighttime AND daylight conditions, so when the pressure is on, you'll locate your sights more quickly and get them on target - fast. A new mounting system holds the Tritium vial more securely to protect it from the ravages of unexpected knocks and dings. The front sight is also brighter than the rear, so it encourages instinctive "Front Sight Focus" to keep your eyes on the target. These sights have a rugged machined 4140 steel housing (NOT plastic), with a tough matte black Nitride finish that provides excellent wear- and corrosion-resistance. Options include the choice of **Square** or **U-shaped** notch on the rear sight. All rear sights have a Tritium insert on each side of the notch; some inserts are enhanced with white surround (WS). Front sights come with a choice of with a of an **Orange** or **Yellow** fluorescing OR a plain **White** outline around the Tritium dot. Sold in front/rear pairs only. **Glock®** set for standard 9mm/.40 S&W/.357 SIG (G17-size) and compact (G26-size) frames available in factory height AND Suppressor Height for use on pistols fitted with sound suppressors. Separate set specifically for **Glock 42/43**. Standard sights fit Glock 17, 17L, 19, 22 thru 28, 31, 32 thru 35, 37, 38 & 39. Sight sets for

NOVAK SEMI-AUTO CARRY REAR SIGHT

Low Profile; Fits Factory Dovetails;
Great Sight Picture

Exclusive, wedge-shaped, "Concealed Carry" design puts the sight body and blade close to the slide for a snag-free draw and smooth, comfortable carry. Highly visible rear blade with re-bated notch gives fast, glare-free sight pickup for more accurate instinctive shooting. Available in **Plain Black (PB)**, with two **White Dots (2 Dot)**, or **Tritium** night sight with two self-illuminating Tritium dots for easy sight acquisition in low light conditions.

SPECS: Machined steel, blued, matte finish. Glock® - .125" (3.1mm) wide notch. Rear Blade - .713" (18mm) wide x .195" (4.9mm) high. Fits factory dovetail in all models of Glock pistols. Requires Novak Glock Front Sights, listed elsewhere. Beretta .150" (3.8mm) wide notch. Rear Blade - .535" (13.6mm) wide x .320" (8.1mm) high. Fits factory dovetails on Beretta 92, Brigadier, and Elite II; may require minor fitting. Uses existing front sights.

NOVAK 1911 AUTO & BROWNING HI-POWER LO-MOUNT REAR SIGHT

No-Snag "Angle" Design; Fast Sight Picture

Smooth, low-profile rear sight has an angled top surface with mitered edges that won't snag on holsters or clothes. Re-bated blade fights glare. Helps aging eyes see front sight more easily. Available in **Plain Black (PB)** or **Tritium** night sight with self-illuminating Tritium insert(s) for easy sight acquisition in low light conditions. **1911** models have a low-profile

setscrew that lets you easily adjust for windage; Tritium model has a horizontal bar under the notch. **Hi-Power** models are fixed; Tritium model has two dots, one on each side of the notch.

MGW SEMI-AUTO DOVETAIL FRONT SIGHT BLANK

Strong & Ready-To-Shape For
Custom Applications

Long enough and high enough for most custom pistol applications. Dovetail installation is much stronger than staking, so the front sight stays put under heavy recoil or extreme use. Drilled for 1/16" diameter roll pin for more "hold". Blues easily.

SPECS: Steel, blued. Blade - .268" (6.8mm) high, .128" (3.2mm) wide, .640" (16mm) long. Dovetail - .65" x .330" x .075".

#584-012-268 Dovetail Front Sight, 4H11P24 \$ 14.99

NOVAK FIBER OPTIC SIGHTS for GLOCK®

Steel Replacement Sights For All Light Conditions

Snag-free, steel front and rear fiber optic sights enable you to find the target quickly in all types of light conditions. Front sights replace Glock factory sights with a slightly angled front edge to prevent snagging. **Tactical Front Sight** covers both sides of light insert for maximum concealability. **Rear Sights** are CNC machined to fit the factory dovetail and include a setscrew; machined light channels provide optimum light gathering. Comes with .060" diameter light inserts. Edges are rounded to prevent drag on holsters or clothing.

SPECS: Steel, blued, matte finish. Tactical Front - is .63" (1.6cm) long, .12" (.3cm) wide. Rear Sights are .66" (1.6cm) long, .72" (1.8cm) wide, .19" (.48cm) high, with .13" (3.3cm) wide notch.

NOVAK S&W M&P EXTREME DUTY REAR SIGHTS

Low-Profile Mounting;
Fully Adjustable; Tritium or
Fiber Optic Dots To Choose From

Upgrade your M&P with a precise, versatile, windage- and elevation-adjustable rear sight that's easy to install because it fits the factory dovetails. Low-profile design similar to Novak's famous Lo-Mount sights has rugged, machined steel construction to stand up to the rigors of tactical operations and daily carry. There's a dot on each side of the notch (choose **Green Fiber Optic** or **Tritium** dots). Smooth, rounded and beveled edges minimize risk of catching or snagging. Set screw allows drift adjustment for windage; elevation screw positively stops and audibly clicks for easy fine-tuning. Rear sights have non-serrated, recessed rear face with .120" wide notch that correctly regulates with front sight. Front sight's gently sloping rear face and rounded front provide a clear sight picture and resists snagging during the draw. Non-glare matte black finish.

SPECS: Steel, matte black finish. F/O = Fiber Optic; TR = Tritium.

NOVAK S&W M&P LO-MOUNT FIBER OPTIC SIGHTS

Fixed Combat Sights Maximize Available Light For Fast Targeting In All Light Conditions

Low-profile fixed sights for Smith & Wesson M&P pistol use glowing fiber optic rods to help you get on target fast, even in low-light or high-stress situations. Makes maximum use of available light so sights stand out against dark targets and backgrounds. Same height as original factory sights, and cut for drop-in fit to factory dovetails—no milling of slide required. Precision-machined, all-steel construction, with non-glare matte black finish, handles the rigors of tactical operations and daily carry. Sloping tops, rounded corners, and beveled edges won't snag on clothing or holster. **Front** sight has one red dot and is .190" high. **Rear** sight has a green dot on each side of the notch; setscrew allows drift adjustment for windage. Wide, .145" notch aids fast acquisition of front sight. Exceptionally low profile - only .236" above slide at the highest point. Recessed rear face helps draw the eye quickly to the front sight.

SPECS: Machined steel, matte black finish, with fiber optic inserts. Fits factory dovetails on S&W M&P pistols; minor fitting may be needed.

NOVAK TRITIUM FRONT SIGHT for GLOCK®

Drop-In Replacement for All Models of Glock Pistols

Easy-to-install, all-steel, replacement sight fits right in the factory dovetail (OK, it's really just a hole for the screw). The self-illuminating Tritium dot matches the Novak 3 Dot Glock Rear Sight and the Glock factory Tritium dot or bar rear sight. Excellent upgrade to enhance the visibility of your sights in low-light conditions.

SPECS: Fits all models of Glock semi-auto pistols. Machined steel, blued. .134" wide, .185" (4.7mm) high.

- #662-005-004 Tritium Dot Sight, 2F50K14..... \$ 58.99

STRIKE INDUSTRIES "IRON" SIGHT SETS for GLOCK® & SIG P320

Traditional Sights Designed To Give a Quick-To-Acquire Sight Picture; Standard & Red Dot/Suppressor Heights

Strike's replacement sights are an affordable option for those who want "iron" sights that deliver more than standard factory sights. They are designed to aid in proper sight alignment, keep the shooter's eyes focused, with natural light visible on both sides of the front sight when it's nestled in the U-notch of the rear sight. Steps in the rear faces of both sights help eliminate unwanted glare, so the sight picture is clean. Lines and angles use natural light reflections and shadow play to keep the shooter's eye aligned and focused on the target. The rear sight is cut with a negative angle so the shooter will see the back wall as dark as possible to direct total focus on the front sight. The line running down the middle of the rear sight catches light from above and further helps the shooter center the front sight. The front sight can be painted to shooter's color preference - or use glow-in-the-dark paint to create semi-night sights. Sight bodies are made from hardened SUS630 stainless steel to be as robust as possible, while keeping the price very reasonable. **Red Dot/Suppressor Height** sets are designed to provide extra height so the shooter can see over an installed sound suppressor AND they provide absolute co-witness with a slide-mounted red dot reflex sight. **Glock®** fits standard frame models, including the 17, 17L, 19, 22, 23, 24, 25, 26, 27, 28, 31, 32, 33, 34, 35, 37, 38 and 39. **Front Sight Heights:** Std Glock, .212"; Suppressor Glock, .357"; Std SIG P320, .167"; Suppressor P320, .339".

TRIJICON BRIGHT & TOUGH™ NIGHT SIGHT SET for GLOCK®

Tall Sights Permit Aiming Over An Attached Silencer

Designed specifically for Glocks with suppressors, these high-profile, self-illuminating sights also work as a co-witness for the Trijicon RMR sight. Steel sights feature Tritium filled lamps for easy sight acquisition in low light. The glowing, green lamps are mounted inside silicone-sealed aluminum cylinders for protection against breaking or leakage. Solvent resistant, sapphire lenses focus and evenly distribute the light while protecting lamps from punctures. Three sight configurations are available: white rings around front and rear lamps, white rings on front lamp with black rings around rear sights, or black rings around front and rear lamps. Gunsmith installation is recommended.

SPECS: Steel, blued, with green Tritium lamps. Fits Glock models; 17, 19, 22, 23, 24, 26, 27, 33, 34, 35, 38, and 39.

TRIJICON® TRITIUM HANDGUN SIGHT SETS

Low-Light Handgun Sights Without Batteries

Nighttime and low-light shooting tests prove sights equipped with these glowing dots are easier to see and more accurate than instinctive shooting with standard black sights. Rugged, self-luminous, 3-dot Tritium emitters provide their own long-lasting energy source. Emitters are mounted in silicone-sealed, metal cylinders to give maximum protection from breakage or leakage. Polished sapphire crystal windows give a bright, crisp and perfectly round aiming dot in low light. Inlaid white rings around each sapphire make the sights appear as standard white dots in daylight. Very narrow blades do not have the white ring and will look more like a plain black blade in daylight. Most can be installed in factory dovetail or sight base. **Glock®** models require use of special Trijicon installation tools to prevent sight damage.

SPECS: Steel, blued with Tritium inserts. Fits guns originally equipped with factory, fixed sights. **S&W** - unless otherwise indicated, these fit 3rd generation only, will NOT fit guns originally equipped with plastic sights.

TRIJICON HD™ & HD XR™ NIGHT SIGHTS

Dual Self-Illumination System For Superior Visibility In Rapidly Changing Light Conditions

Tactical night sights employ a combination of self-illuminating Tritium inserts and photoluminescent paint for superior visibility in varying low-light conditions. Tritium dots on each side of the rear sight notch align with the front sight dot for a simple, horizontal, three-dot sight picture that's easy to acquire even under stress. Bright orange or yellow outline around the front insert emits a short-term glow of its own

that gives the eyes more time to adjust to a rapid reduction in ambient light—such as during a building entry—and pick up the Tritium insert. The outline is charged by exposure to any artificial or natural bright light. Yellow luminesces for approximately 10 minutes when fully charged; orange glows for approximately 5 minutes on a full charge. Fixed rear sight has a wide U-shaped notch to guide your eye quickly the front sight. Pronounced ridge on the front face enables one-handed racking of the slide in an emergency, yet is contoured so it won't snag during the draw.

HD XR™ model has a thinner front sight post that allows the shooter to have a larger field of view, enhancing his ability to identify the target, engage it, and see the location of hits on the target at longer distances. This is a big advantage for law enforcement personnel who need precise visual engagement in any light conditions.

SPECS: Machined steel sight body, de-horned, matte blued finish. Sold as front/rear sight sets. All sights have **GREEN** Tritium inserts, with **Orange** or **Yellow** outline on front sight only, as indicated in the "Color" column in the table below. Gunsmith installation recommended.

TRIJICON FIBER OPTIC SIGHT SETS for GLOCK®

Bright, Glowing Front Dot Draws the Eye; Lay That Dot on the Target & Score Hits

Sometimes you need the added capabilities of advanced Tritium sights or Tritium-plus-fiber optic... and sometimes you just need a bright, crisp, fiber optic front dot to draw your eye like a science-fiction tractor beam and help you get the sights on the target STP (Sooner Than Possible). And that's what Trijicon's Fiber sights are for. The thin front-sight blade allows for extra light around it when you line it up in the U-notch rear sight, so it's easier to get centered quickly. This .110" front sight is just wide enough to accommodate the .060" diameter fiber optic dot that makes acquiring the target in your sights about as fast as it's going to be in real life. The rear sight has a serrated, non-reflective rear face, with a U-notch that's .125" wide. Fits the factory dovetails; front sight uses standard Glock® screw (tool required, not included). Comes with 2" lengths of fiber RED and GREEN optic rod so you can choose the color you want on the front sight (and change later on, too). Sight body is steel, so it'll stand up to hard use and aggressive holstering, with a tough matte black finish. De-horned, rounded edges ensure the sight does not cut up your hand or the holster. **SPECS:** Steel, matte black finish. De-horned, rounded edges ensure the sight does not cut up your hand or the holster. **SPECS:** Steel, matte black finish. De-horned, rounded edges ensure the sight does not cut up your hand or the holster.

TRIJICON® REPLACEMENT FRONT SIGHT SCREWS for GLOCK®

Replaces Lost Or Damaged Screws On Night Sights

Replace lost, broken, stripped or rounded off screws on Trijicon front night sights for Glock pistols. 3/16" hex head fits standard front sight wrenches used for most threaded Glock front sights. Use with a low to medium strength thread locking agent for a solidly mounted front sight that won't "shoot off." Fits Trijicon brand Tritium front sights for all Glock models. **SPECS:** Steel, matte, blue finish. 5 per pak. 2.5 mm x 0.5 mm thread, .090" long shank, 3/16" dia. hex head.

#892-000-049 Front Sight Screws, 5-pak, 2H00FCJ. . . \$ 15.99

TRUGLO TFO & FIBER OPTIC SIGHT SETS for GLOCK® & OTHER PISTOLS

Advanced Sight Systems For All Shooting Conditions, Day & Night

High-quality sight systems offer exceptional brightness in a low-profile configuration that won't hang up in your holster or slow you down. Popular three-dot system provides fast sight alignment in high stress situations. Direct replacements for factory sights. **SPECS:** Steel, matte black finish. Sight heights same as factory.

FIBER OPTIC SIGHTS - Fiber optic rods gather ambient light and produce a brilliant shine in bright and low-light conditions without battery power. Contrasting green rear and orange front ensures fast sight recognition and alignment. Rods are recessed and fully protected in the sight channels to survive the toughest blows and remain hidden from your target. **131G1** fits Glock 17, 17L, 19, 22, 23, 24, 26, 27, 33, 34 and 35. **131G2** fits Glock 20, 21, 29, 30, 31 and 32. **Kimber** fits Kimber 1911 with factory sights. **S&W M&P** fits 9mm & 40 Smith & Wesson M&P pistols.

TRUGLO SMITH & WESSON M&P + SHIELD TFO FRONT & PLAIN REAR SIGHT SET

Easily Transition Through All Light Conditions

Low profile, tactical sight set comes with a high visibility TFO front sight that naturally attracts the eye, while the plain rear sight won't distract your focus. Serrations on the rear sight help reduce glare in bright daylight. Made exclusively for, and available only through Brownells, these high quality sights are ideal for competition, combat or low light shooting. **SPECS:** Steel, matte black finish. Green Tritium/fiber optic rod. Sight heights same as factory. Fits Smith & Wesson M&P including Shield and 22 models (excluding .22 Compact/C.O.R.E. models), SD9 and SD40 (excluding VE models).

TRUGLO TFX™/TFX™ PRO DAY/ NIGHT SIGHTS

Visible In Any Light, Handles The Harshest Operating Conditions

"Extreme" tactical sight combines Truglo's high-visibility TFO® technology with a rugged steel sight body that encases and protects the components inside from impact damage. Combination of Swiss-made Tritium inserts, light-gathering fiber optic rods, and simple white target rings ensures these sights are visible 24/7, in any light conditions. Hermetically sealed TFX capsule protects the Tritium and fiber optic elements from moisture, oils, and cleaning solvents. Sold in green front/rear sight sets for factory dovetails. **TFX Pro** sights are ruggedized to provide tactical professionals and other shooters with sights that deliver ultimate reliability, accuracy, and brightness no matter how tough things get. In addition, they also offer a contrasting orange ring around the front dot and a U-shaped rear notch that make it even easier to align the sights quickly. Front edge of the rear sight is angled to enable emergency one-handed slide racking. **SPECS:** Smith & Wesson M&P fits all models, including Shield and .22 (excluding .22 Compact/C.O.R.E. models); also fits SD9/SD40 (excluding VE).

WARREN TACTICAL FRONT SIGHT SCREWS for GLOCK®

Non-Corroding Stainless Steel Replacements For Aftermarket Sights

Stainless steel screws have the standard Glock 3/16" hexagonal head but a shorter shank for correct fit on threaded aftermarket front sights from Warren Tactical, Novak, Trijicon, and others. Inexpensive, corrosion-resistant replacements for lost or dinged up screws that came with your sights. Fits standard Glock front sight tool. Use with thread-locking agent to ensure a secure installation. Recommended for all Warren front sights for Glock, including Tactical, Sevigny, Fiber Optic, and Tritium Night Sight models sold individually and in sets. Available in 2- and 5-Paks. **SPECS:** Stainless steel, natural finish. .110" long shank. 3/16" (.188"/4.8mm) diameter head. 3-56 thread pitch.

TRUGLO STANDARD TRITIUM NIGHT SIGHT SETS

Self-Illuminating Sights You Can Pick Up in Any Light

Sometimes you need enhance-ments, sometimes you simply need a bright, steady-glowing, reliable Tritium night sight that comes through when the lights go out. These sights look like standard white dot sights in daylight and transition to glowing green dots as the ambient light decreases. Self-illuminating Tritium does not need batteries and does not need to be "charged" with exposure to sunlight - it simply glows on its own! Three-dot sight pattern; all dots are green. These sights have strong, "de-horned" machined steel housings, with a low enough profile that they won't interfere with putting your gun in a standard holster made for it. **SPECS:** SIG #6/#8 fits Sig Sauer pistols that use a #6 front and a #8 rear.

TRUGLO TRITIUM PRO NIGHT SIGHTS

Ultra-Rugged & Reliable, The Next Step in Tritium Sight Development

Starting with the brightness and durability of their original Tritium night sights, TruGlo added all of their TFX PRO features to give you the advantage when you need it the most. The front sight's "focus lock" ring works with the U-notch rear sight for even faster focus. Angled rear sight edge enables emergency one-handed slide racking. Swiss Tritium inserts deliver maximum brightness for unmatched visibility in low-light shooting conditions. Snag-resistant machined steel sight bodies have TruGlo's ultra-hard Fortress Finish™ that provides a permanent protective coating for maximum protection against scratches, nicks, and holster wear. Pistol will still fit standard holsters with these sights installed.

WARREN TACTICAL PISTOL SIGHTS

"Working" Sight For Duty, Carry, Or Competition; Fiber Optic & Tritium Options

Used by numerous IDPA and USPSA National champions, as well as law enforcement professionals, these streamlined, steel sights are built for fast target acquisition. A variety of front and rear sight configurations, including fiber optics, self-illuminating Tritium inserts, and plain black, let you mix and match for carry, competition or tactical operations. Designed to fit factory dovetails with little to no fitting required. Ramped **Front Sights** are available with a black, serrated rear face to minimize glare, interchangeable bright red or green fiber optic rods for fast acquisition in diverse light conditions, or Tritium inserts with white ring outline. **Rear Sights** have a non-serrated face and are available in plain matte black for optimal contrast in bright light, as well as in 1-dot or 2-dot Tritium configurations for low light and night use. Drift-adjustable for windage, with a locking setscrew to hold the setting. **Sevigny Competition Set** rear sight features a plain, square notch and a crisp, clear outline with no serrations, points, edges, or other distractions. Rear face slopes back toward the shooter at the top to prevent glare. **Sevigny Carry Rear Sight** has the same features as the Competition, plus rounded edges on the rear face to resist snagging on clothing during carry or unholstering. **Tactical** rear sight features a unique Wave Profile contour with concave corners for an extra wide field-of-view and smooth, no-slug removal from the holster. U-shaped notch has gently radiused corners to help direct the eye quickly to the front sight acquisition.

SPECS: Hardened steel, matte black finish. **Fiber Optic** sights come with 1 red and 1 green rod, 2" long x .040" dia. **Tritium** - Front sights: Green with .100" dia. inlaid white ring outline, .050" dia. Tritium lamp. Rear sights: Yellow, .040" dia. Tritium lamp. **Sight Sets** - Front and rear sights are fully regulated. Front Sights - All have serrated rear face, except Tritium. Front sights for Glock include hexagonal mounting screw. Rear Sights - Sevigny - .150" wide notch. Tactical - .145" wide notch.

WILSON COMBAT VICKERS ELITE BATTLESIGHTS for GLOCK® & H&K

Rear & Front Sights Help With Quick Sighting

Steel sights drop into Glock pistols in 9mm, .357 Sig, 40 S&W and 45 GAP, and help improve sight picture and add functionality. All sights have serrated faces to cut glare in bright sunlight and come with installation hardware and tools. **Rear Sights** have a wide U-notch that helps the eye quickly pick up the front sight, even in low light. Special shelf shape helps with one-handed cycling or malfunction clearing. Two set screws help secure rear sight in place once it's drifted into the rear sight notch. **Glock® Sights** - Rear sight is .245" tall and designed to work with Vickers Elite front sights, or other front sights .125" wide and .245" tall. Front Sights are sold separately and available with green or red fiber optic insert or green Tritium insert. Feature a snag-free design that won't impede draw from duty holster or from concealment. May require minor fitting. Glock sights do not fit 45 ACP or 10mm pistols. **H&K Rear Sights** fit Heckler & Koch VP9, P30SK, P30L, P30, HK45, HK45C, and HK45C Tactical. They will NOT fit the P2000, USP, or older H&K models. **SPECS:** Steel, Parkerized finish, matte black. **Rear Sight:** U-notch .145" (3.6mm) wide. **Front Sight:** .245" (6.2mm) high.

WILLIAMS FIRE SIGHTS

Glowing Fiber Optic Dots For Fast Sight Pickup

Direct replacements for factory sights on popular handguns gather ambient light for superb visibility. The more light, the brighter the rods glow. 3-dot sight picture with contrasting red and green fiber optic inserts. The Fire Sights for guns originally equipped with fixed sights are also fixed. If the gun was originally equipped with an adjustable rear sight, the Fire Sight will be adjustable. **SPECS:** Aluminum body, black finish. Red and green fiber optic rods. **Browning Buckmark** fits current Buckmark with rear sight more than 1" long. **Ruger® GP100®** also fits Redhawk® and Super Redhawk®. **Ruger Single Six** fits New Model Single Six® - .22 and .32 caliber.

XS SIGHT SYSTEMS DXT2 BIG DOT SIGHT SETS

Front Sight Designed for Fast, Intuitive Acquisition - Ideal for Concealed-Carry / Daily Defense Pistols

No matter what time of day or night you may need to call upon your personal defense pistol, XS's DXT2 Big Dot sights ensure you will "acquire" your sights the instant you raise that pistol. The whole point of the huge self-illuminating Tritium front dot surrounded by bright glow-in-the-dark photoluminescent ring in your choice of yellow or orange, is so your eye catches that front sight instantly, and of course automatically centers it above the Tritium bar at the bottom of the shallow "V" formed by the rear sight. It's a fast, instinctive system that automatically aligns your sights when you "dot the I". The shallow rear notch also give you an excellent field of view around the target. These sights are ideal for targets inside of 15 yards. They fit the factory dovetails (front sight tenon on your Glock), and their profile is low enough that they will not interfere with the holster you already have (or any that you may get in the future for your pistol). Sturdy machined steel sight body, nicely de-horned, with matte black finish. Some fitting may be required but can be performed with a simple file. All Tritium inserts are green.

#006-000-222	DXT2 Big Dot Orange Glock 9/40, 6K107H99	\$ 119.99

XS SIGHT SYSTEMS SUPPRESSOR-HEIGHT EXPRESS SIGHT SET for GLOCK®

High-Visibility, Rapid Sight Picture

Suppressor-height sights provide proper height on a gun fitted with a sound suppressor, recoil compensator, or Trijicon RMR red dot sight. White line, V-notch rear sight and a white dot front post pull your eye to the front sight in high stress or low light conditions. Presents a very fast, highly visible sight picture to get you on target quickly. Low-profile, no-slug design (even the top of the front sight body is rounded) is great for carry and combat competition guns. Matched front and rear sets offer direct replacement of factory sights. Standard-size dot gives excellent long range accuracy.

is great for carry and combat competition guns. Matched sight sets offer direct replacement of factory sights. **Standard Dot (STD)** front sight has narrow white ring around the Tritium dot for precise aiming at longer distances. **Big Dot (BD)** front sight has a large, easy-to-see white ring surrounding the Tritium dot. **Suppressor Height** provides proper sight height on a gun fitted with a sound suppressor or recoil compensator. **S&W Airlite Ti** replaces pinned front sight on fixed sight guns, requires drilling for pin. **SPECS:** Machined steel, matte black. **Standard Dot** - .110" (2.8mm) dia. dot. **Big Dot** - .161" (4mm) dia. dot. All rear sights are secured with one or two setscrews. All sights are fixed. Gunsmith installation recommended.

XS SIGHT SYSTEMS F8 NIGHT SIGHT SETS

Get the Sights on the Target FAST - Even in Dim Light

Set for Std Frame (G17) Glock® A simple, clear sight picture!

XS is calling them "Night Sights," but in reality F8 sights will improve your shooting in ANY light conditions, day or night. Of course, they have the traditional, self-illuminating Tritium inserts at the front and rear. It's a two-dot, stacked configuration that'll look a lot like a figure 8 when properly aligned - hence, the name "F8." A big, bright, orange ring around the front dot bolsters your front sight focus, as the rear sight's wide U-notch allows extra light around the front sight to further enhance its visibility and help you quickly get it centered in the notch. The U-shape of the rear notch helps draw your focus to its top edges for proper alignment with the front. This is a simple, fast notch-and-post solution that enables fast sight acquisition in pretty much any lighting conditions. Just to ensure there'll be no way you can miss the front sight, the orange ring is actually photoluminescent - meaning that it absorbs ambient light and then glows in low light. Just like those toys you got out of the cereal box as a kid, only much, MUCH better! The top of the rear sight face angles toward you to reduce glare in bright daylight. A ledge on the rear sight aids in emergency one-handed slide racking. Easy, drop-in installation; a sight pusher tool will make installing the rear sight go faster. **Glock®** model requires standard Glock front sight tool. **SPECS:** Steel sight body, non-reflective matte black finish. **Glock®** models fit all Generations, including Gen5 (where applicable).

**XS SIGHT SYSTEMS 24/7 TRITIUM
EXPRESS REVOLVER FRONT SIGHTS**

Easy-To-See In Any Light; No-Snag Shape
For Concealed Carry

Replacement front sights have a high-visibility white outline surrounding a Tritium insert for easy sight acquisition in all types of ambient light—from bright sunlight to nighttime, and anything in between. Low, streamlined, no-snag shape makes these sights excellent for concealed carry guns. Designed to fit factory dovetails. Models available for Smith & Wesson J-Frame and Ruger® LCR®.

SPECS: Machined steel, matte black finish. *S&W J-Frame* - .161" (4mm) dia. dot; *LCR* - .110" (2.8mm) dia. dot. Both sights fit factory dovetails. Gunsmith installation recommended.

**ZEV TECHNOLOGIES GLOCK®
SIGHT SETS**

Faster Sight Acquisition, Plus a
Better Sight Picture

If there's a small chink in the Glock's armor, it's the factory sights. They're made of plastic, and the sight picture is serviceable but not great.

ZEV has done a lot to help folks upgrade their G-pistols, and these sights are a simple, fast solution to the so-so sight situation. They're made of machined billet STEEL, with a tough, matte black oxide finish, so a few knocks and bumps aren't gonna put them out of commission. Both front and rear have crisp serrations on the rear face to cut glare, even in full-on daylight, while the sharply defined, square-bottom rear notch helps you get the front sight centered pronto, even under stress. Depending on your tastes, you can get a traditional plain black front sight or one with a bright, ambient light amplifying fiber optic insert that'll further enhance your speed in locating the front blade. If you opt for the fiber optic front, each set comes with interchangeable red and green rods. Straight one-for-one, drop-in replacements for factory sights.

SPECS: Rear sights all have a .140" wide x .145" high square notch. Front sight heights vary as indicated in listing below. Fits Gen1 thru Gen4 small Glock pistols: 17, 17C, 17L, 19, 19C, 20, 20C, 20S, 21, 21C, 21S, 22, 22C, 23, 23C, 24, 24C, 26, 27, 29, 29S and 30.
